WORK EXPERIENCE

Front End Developer Internship   March 2024 - Present
DesignBot GitHub
- Working and resolving front-end issues using React and Typescript
- Collaborating with other developers to build other front-end features to manipulate SVG files

Full Stack Developer Internship   October 2023 - March 2024
BRICKMMO GitHub
- Designed and developed a captivating Event page using PHP and SQL, and increased event attendance rate by 10%
- Collaborated with other developers to build an admin dashboard with CRUD functionality and authentication for the Event website and achieved a performance score of 86
- Achieved an average 4/5 -star review for developing a LEGO wishlist website using React and JavaScript so students can search for a specific LEGO set and save to their wishlist

Web Support Specialist   July 2023 - September 2023
Ontario Public Services
- Reduced ticket numbers by 50% by providing excellent technical support within 24 hours, instead of the usual 72 hours
- Implemented updates and enhancements to web content using content management systems, resulting in a 20% increase in user engagement
- Conducted ad-hoc testing to identify and report website defects, such as, poor navigation, broken links, or inconsistent button designs, improving website performance by 10%

PROJECTS

Cocktail App with Admin Functionality | GitHub | Node.js, Express.js, Pug.js, MongoDB
- Developed a responsive cocktail app to store drinks on MongoDB with an admin page that performs CRUD operations
- Users can add their favourite cocktail drinks and have the data saved to MongoDB database and display on the website
- The admin functionalities include add, update and delete the cocktail entries

Danceforce Now | GitHub | C# ASP.NET, SQL
- This dance app features the use of Code-First Migrations to create a database and it also features WebAPI and LINQ to perform CRUD operations
- Employed View Models to visually represent the 1-many and many-many relationships
- Configured Entity Framework to organize and manage data, optimizing database interactions

VOLUNTEER

Web Developer   April 2024
Chicago Tap Theatre Live Demo | WordPress
- Worked closely with the design team at Chicago Tap Theatre to designed and built a-five-page website using WordPress within 48 hours.

Housing Hackathon   March 2024
Seneca Hackathon
- Won second prize in the Hackathon and first prize in the Community Wellbeing category, competing over 300 teams
- Colaborated with a dynamic team consists of two full-stack developers and two UX/UI designers to create **Tidii** - a cutting-edge gamified chore app integrating AR and AI technologies.

Solo Game Jamer   January 2024
Global Game Jam GitHub | Live Demo | HTML, CSS Animations, Vanilla JavaScript
- Developed an interactive game called Calamari Bash using Vanilla JavaScript within 48 hours of the Game Jam
- Contributed 120+ lines of codes and presented in front of the committee
